

2021 HISTORIC PRODUCT CONTENT LABEL

**The product is sold in blocks of 100 kilowatt hours (kWh).
The product was made up of the following renewable resources:**

Green-e Energy Certified New² Renewables in Green Power	2021¹	Generation Location
Landfill Methane Gas	> 47%	South Carolina
Solar	< 53%	South Carolina
Wind	< 1%	South Carolina
TOTAL	100%	

¹ The 2021 figures reflect the power resources generated and supplied for the year ending December 31, 2021. Change in product mix occurred to diversify our renewable portfolio that historically consisted of a large portion of Landfill Gas generation.

² New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product includes generation from a facility that is approved for extended use by Green-e Energy.

For comparison, the current average mix of resources supplying Santee Cooper includes: Coal 36.98%, Nuclear 11.17%, Oil - 0.0%, Natural Gas 23.8%, Hydro 3.4%, Methane 0.0%, Solar 0.0%, and Other 24.65%. (Source: 2021 Santee Cooper actual generation data)

The average home in South Carolina uses 1,081 kWh per month. (Source: Energy Information Administration 2020)
